

ABOUT ME

I am an Economic Informatics student with a strong interest in product design, cybersecurity, and AI-assisted digital products. I enjoy researching solutions, analyzing problems, and transforming ideas into intuitive and visually appealing user experiences.

During my internship, I contributed to the design and refinement of a B2B SaaS platform by researching UI patterns, improving layouts, testing interfaces, and collaborating through AI-assisted development workflows. I am curious, adaptable, and motivated to continuously learn new technologies. I am currently looking for internship or entry-level opportunities where I can contribute with creativity, analytical thinking, and a strong willingness to learn.

EDUCATION

Bachelor's Degree in Economic Informatics (Ongoing)

Ștefan cel Mare University of Suceava

2024 – Present (2027)

- Databases
- Programming Fundamentals
- Python
- C++
- SQL
- Statistics
- Economics
- Accounting
- Marketing
- Project Management

EXPERIENCE

Junior Web Development Intern

May 2026 – July 2026

Raisis Software

- Contributed to the development of a B2B SaaS platform using AI-assisted development workflows.
- Researched modern UI patterns, components, and design solutions to improve usability and visual consistency.
- Refined layouts, typography, color palettes, and UI components to improve visual consistency and user experience.
- Tested interfaces and identified visual or usability issues.
- Collaborated using Git, GitHub, and Vercel in a modern development workflow.

PROJECTS

TwinGrid AI | AI-powered Digital Twin SaaS Concept

Award-winning university entrepreneurship project

TwinGrid AI is a SaaS concept designed to help commercial buildings optimize energy consumption using Digital Twin technology and artificial intelligence. As part of the project, I contributed to the product concept, market research, business model development, and software planning while collaborating within a multidisciplinary team. The project strengthened my interest in digital product development, user-centered design, and AI-driven innovation.

CyberSafe Toolkit | University Cybersecurity Project

A desktop application developed as part of a university cybersecurity course using Windows Forms. The application implements practical security utilities, including hashing, Base64 encoding, and URL defanging, demonstrating fundamental cybersecurity concepts and secure data handling techniques.

CERTIFICATIONS

- TryHackMe – SOC Level 1 (path)
- Software Quality Assurance
- Entrepreneurship & Innovation
- Sustainability & Business Innovation

VOLUNTEERING

Technical Support Volunteer

Ştefan cel Mare University of Suceava

- Assisted with IT laboratory setup and maintenance.
- Supported scientific conferences and university events with technical logistics.
- Helped process research data and provided technical assistance.

Media & Communications Volunteer

- Created promotional materials for university events.
- Edited videos and managed social media content.
- Supported communication campaigns and visual content creation.

Humanitarian Volunteer

- Assisted refugees arriving at the Romanian-Ukrainian border.
- Coordinated logistics and distributed essential supplies.
- Collaborated with local authorities and volunteer organizations.

SKILLS

Product & Design

- UI Research
- User Experience (UX)
- AI-assisted Prototyping
- Visual Design
- Color Theory
- Interface Analysis

Technical Foundations

- Git & GitHub (basic)
- Next.js (basic familiarity)
- HTML/CSS (basic familiarity)
- SQL (academic)
- Python (academic)
- C++ (academic)

Tools

- Microsoft Excel
- Microsoft Office
- Canva
- AI Tools (ChatGPT, Claude, Cursor, etc.)

Cybersecurity

- TryHackMe SOC Level 1
- OSINT
- Security Fundamentals

Soft Skills

- Problem Solving
- Research
- Analytical Thinking
- Creativity
- Communication
- Adaptability

LANGUAGES

Romanian — Native

English — C1 (Reading & Listening), B2 (Writing & Speaking)

Chinese — A1
